

Mobile app available

Want immediate access to your medical information anytime, anywhere? Download the free MyChart mobile app to get on-the-go access via your smartphone or mobile device.

Get convenient access to many MyChart services:

- Send messages to your care team
- View after-visit summaries and care instructions
- View most test results
- Request prescription renewals

It's easy—get started today

Search keyword “mychart” to download and install the free app from iTunes App Store™ or the Google Play™ Store. Select Providence as your health care provider. Log in using your Providence MyChart login ID and password.

If you don't have a MyChart account, ask your care team how you can sign up for one today.

Or visit <https://mychartwa.providence.org/mychart/> to request an activation code.

Teen MyChart

For teens ages 12-17, Teen MyChart access is available. Access for Teen MyChart is granted at the provider's discretion based on the patient's need for a secure access to their care team. A parent who has a teen child age 12 through 17 may now have limited proxy access. Adult accessing teen proxy access will only allow the parent to message with the teen's Provider(s) on behalf of the teenage patient. All other MyChart features are disabled. Providers may choose to grant the parent(s) of a mentally disabled teenager (12-17 years of age) full proxy access to their child's medical record via MyChart.

Teen MyChart offers the following MyChart features:

- MyChart messaging
- View appointments
- View letters
- View-only access to allergies
- View-only access to immunizations
- View-only access to medications

How do I sign up?

Teens are only able to sign up for MyChart during an office visit. Other methods of MyChart signup are not available to this age group.

Welcome to *MyChart*

What is MyChart?

As a Barrett Hospital & HealthCare patient, you have the convenience of MyChart—a free, online service that gives you secure access to your health record—wherever you are. MyChart gives you direct online access to portions of your electronic health record (EHR) where your doctor stores your health information.

With MyChart, the patient is able to:

- View labs, test results, medications, immunizations, other medical information
- View messages from and send messages to your care team
- Renew prescriptions
- Request medical records*

*When a patient uses the Release to MyChart button and the release is successful, the patient will receive an email notification with instructions to access their requested records as a PDF file to view or download. The records will be available for 30 days, after which point, the PDF file will expire, and will not be available to download.

Get connected to your health!

Who can sign up for MyChart?

You must be at least 18 years old and have an established relationship with a Barrett Hospital provider or have been a patient at Barrett Hospital to register for and use MyChart services. During your next office visit, ask your health care team to turn on access to your records. You may also request an activation code online—visit:

<https://mychartwa.providence.org/mychart/>

Is MyChart secure?

Yes, only you and your health care team are permitted to view the information sent through MyChart. We use the most up-to-date security practices and safeguards to protect your health care information. MyChart is password-protected and delivered via an encrypted connection. Unlike regular email, MyChart messages are securely sent through the MyChart website.

Get Connected to Your Child's Health with MyChart

For parents of children under 12 years of age, MyChart offers personalized and secure online access to portions of your child's medical record.

Through the MyChart website, you will be able to:

- Review your child's health summary
- Print out immunization records
- Receive routine lab results
- Request certain types of prescription refills
- Request non-urgent medical advice from your provider

Communicating with your child's provider

The electronic messages are reserved for non-urgent medical questions or questions regarding recent visits that you feel need to be specifically addressed to your provider. This service is not intended for routine medical advice.

How do I sign up?

During your next office visit, ask your health care team to set up proxy access to your child's medical record. Get connected to your child's health!

Please note that once your child turns 12, their MyChart (along with the parent's proxy access), is deactivated automatically.
